Amphenol® GT Connectors

Amphenol® GT reverse bayonet coupling connectors with MIL-C-5015 insert patterns features:

- Quick positive coupling
- Audible, tactile and visual indication of full coupling
- Waterproof
- No lockwiring required
- High shock and vibration capabilities
- Inserts available in Neoprene and Viton* materials
- Low smoke/flame retardant inserts also available
- Operating temperature range:
With Neoprene inserts: -55°C to $+125^{\circ}\text{C}$
With Viton** inserts: -50°C to $+200^{\circ}\text{C}$
With low smoke/flame retardant inserts: -55°C to $+125^{\circ}\text{C}$
- Available in both crimp and solder terminations
- Contacts available in gold and silver plating
- Thermocouple contacts available
- Numerous military and commercial finishes available
- Zinc alloy plating (cadmium free) available
- Rugged construction; aluminum or stainless steel components
- Available with resilient cover coupling for added damage protection and increased gripping surface
- Intermateable with existing VG95234 connectors
- 2000 couplings minimum

Amphenol® GT Connectors feature a quick mating bayonet coupling with an audible, tactile and visual full mating feature. Designed originally for use by the military, the heavy duty GT connector has become widely used in commercial, geophysical, aerospace, ground support and ship-board applications.

See page 84 for Amphenol's newest offerings of GT Series connectors - the GT-PC for high voltage power applications and GT connectors with color-coded receptacles and backshells for the HMI lighting industry.

For further information on your individual application requirements, contact:

Amphenol Corporation
Amphenol Aerospace
40-60 Delaware Avenue
Sidney, New York 13838-1395
Phone: 607-563-5011 Fax: 607-563-5351

NOTE:

The connector products in this brochure were formerly known as Bendix® products. These products are now manufactured and sold under the Amphenol® brand name. The name "Amphenol" will replace the name "Bendix" on products and literature in the future.

1 ** For availability of Viton inserts consult Amphenol, Sidney, NY. Viton is a registered trademark of Dupont/Dow Corning.

** Coaxial cable data can be found on insert arrangement drawings, pages 18-26. For further information on coaxial contacts and cable see catalog 12-130.

MS/Standard insert alternate positioning

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the accompanying charts.

As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

The following insert arrangements have the same alternate insert rotations for W, X, Y and Z, which are:

Degrees			
W	X	Y	Z

Special contact arrangements

Requirements for more complex circuits prompted Amphenol to provide inserts not covered by the MS drawings. Illustrated here and on the following pages are insert layouts which have from one contact (high tension) to the 62 contact insert in shell size 40.

Many of these special inserts are also available in alternate keyway arrangements. Please contact Amphenol, Sidney, NY for additional information on special circuit application requirements.

Thermocouple contact availability

A complete line of cylindrical connectors containing thermocouple insert arrangements is available. The contact layout for a particular arrangement will be found in either the MS/Standard contact arrangement section, pages 26-37, or the Special contact arrangement section, pages 38-48. All thermocouple contact layouts may contain either iron, alumel, chromel, constantan, standard (copper) or brass (dummy) contacts. See the thermocouple tabulations on the following pages.

The following abbreviations are used in the contact material column in the charts that follow. Also, thermocouple contacts are color coded as shown. (This identification is made by means of small dots of stain on the solder well end of the contact).

Abbreviation	Material	Color Code
Ir.	Iron	Black
Con.	Constantan	Yellow
Cu.	Copper Alloy	N/A
Ch.	Chromel	White
Al.	Alumel	Green
Dummy	Brass	N/A

WIRE WELL DATA

Contact Size	Well Inside Dia. +.004 -.002	Well Depth +.031 -.000	Solder Well Barrel Outside Dia.
12	.125	.250	.166 ±.003
16	.094	.188	.125 ^{+.002} -.004

RECOMMENDED WIRE

I Chromel - Alumel	Use wire in accordance with MIL-W-5848
II Iron - Constantan	Use wire in accordance with MIL-W-5845

GT06CFGG

straight plug

- With rubber covered coupling nut for extreme shock applications
- The shrouded coupling nut protects the plug from damage
- Provides a superior gripping surface
- Seals the bayonet ramps
- Includes a backshell
- Mates with GT020RFSM (see page 47)
- Environment proof

GT Connectors – accessories

10-40450, 10-36675, 10-580649 sealing gaskets

The Amphenol® plain flat gasket of synthetic rubber material is provided to take complete advantage of waterproof and pressure sealing features. It is for use with the flange mounted receptacle.

This flat gasket is provided to give the maximum in connector performance. Its special feature is in providing the maximum radio shielding under difficult conditions of high receiver sensitivity and low signal strength while retaining the sealing characteristics of the plain gasket. This gasket is for use with the flange mounting receptacle.

This gasket is provided for applications where the major requirement is resistance to the injurious effects of extremely low temperature. Even at temperatures as low as -67°F this gasket retains its resiliency and will seal a pressure differential of 30 psi.

The rear panel gasket is equivalent to the plain flat gasket made of synthetic rubber material, and is used for back panel mounting.

GT Connectors

solder contacts

Machined copper alloy contacts in a full range of sizes, with closed entry socket design in the size 12 and 16 contacts. A heavy silver-plated finish is deposited on all MS style solder contacts for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop. Gold plated contacts are also available. (See how to order, pg. 83).

* Solder Wells Filled

** Contact ratings as stated are test ratings only. The connector may not withstand full rated current through all contacts continuously. Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

Table I
CONTACT ARRANGEMENT
SERVICE RATING

MS Service Rating	Recommended Operating Voltage* at Sea Level		Effective Creepage Distance Nom.	Mechanical Spacing Nom.
	DC	AC (RMS)		
Inst.	250	200	1/16	
A	700	500	1/8	1/16
D	1250	900	3/16	1/8
E	1750	1250	1/4	3/16
B	2450	1750	5/16	1/4
C	4200	3000	1	5/16

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

Table II
ALTITUDE VOLTAGE
DERATING CHART**

MS Service Rating	Nominal Distance		Standard Sea Level Conditions		Pressure Altitude† 50,000 Feet		Pressure Altitude † 70,000 Feet	
	Airspace	Creepage	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)

A	1/16	1/8	2800	2000	800	600	450	360
D	1/8	3/16	3600	2800	900	675	500	400
E	3/16	1/4	4500	3500	1000	750	550	440
B	1/4	5/16	5700	4500	1100	825	600	480
C	5/16	1	8500	7000	1300	975	700	560

† Not corrected for changes in density due to variations in temperature

** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.

GT Connectors

crimp contacts

Machined from copper alloys and silver-plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all MS insert arrangements and are identified with an Amphenol® proprietary number. Gold plated contacts are also available. (See how to order, pg. 83).

MS Standard application tools

When proprietary crimp contacts are employed rather than the standard MS approved solder contacts, the following application tools are recommended for use. There is a possibility of additional crimping tools other than those included being available at present or in the future for this specific application.

Complete instructions for providing reliable crimped wire to contact terminations and inserting proprietary crimp contacts in GT Series connectors are available in publication L-1295.

Special Application GT Connectors

GT-PC Connectors for High Voltage Power Applications

The Amphenol® GT-PC connectors were developed for use in the High Voltage Power Distribution industry. Incorporating all the standard features of the popular GT series, these connectors will prevent accidental electrical shocks to the technicians. "Dead Front" pin contacts in size 0 are recessed into a socket insert, preventing inadvertent contact with a live circuit. The GT-PC series has been UL approved.

"First Mate - Last Break" features on one or more of the pins provide an additional measure of operator safety.

Termination to the conductors is accomplished with an Allen wrench or the traditional crimp or solder method. If Allen wrench is used, torque allen screws 40-50 in. lbs.

Other features of the GT-PC connector include:

- Quick positive coupling; audible, tactile and visual mating indicators
- Full range of shell styles available
- Waterproof
- No lockwiring required
- Wide selection of backshells and adapters available
- Numerous conductive and non-conductive plating options
- Heavy duty, rubber over-molded coupling nut increases gripping surface and prevents damage to the connector in severe environments
- Up to 100 amps per contact, continuous current carrying capability
- Available in insert patterns:
22-7, 36-4, 36-5, 40-5, 40-57
Consult Amphenol Aerospace for availability of other patterns.

For further information on Amphenol® GT-PC connectors, request Product Data Sheet #173 from your local Amphenol sales office or Amphenol, Sidney, NY.

Amphenol® GT-PC Connectors with Features that Provide Increased Operator Safety

GT Connectors for the HMI Lighting Industry

Amphenol provides the GT connector for the HMI lighting industry. These connectors are designed for the rugged use experienced during stage shows and other entertainment events, even outside in the elements. The same GT feature of a three point bayonet coupling system which gives visual and tactile indication of full mating, and the same ruggedness to survive 2000 mating cycles are provided.

Unique features of this connector series include color-coded receptacle shells with matching backshells on the cable plugs. The colors can be matched to specific wattage cables and/or light systems. A wide selection of environment adapters designed to seal on the outside diameter of specific cable diameters can be fitted to the backshells.

Applications for these connectors include power and control of lighting trusses, and portable power and dimmer racks.

For more information on Amphenol® GT connectors for the HMI lighting industry request Product Data Sheet #174 from your local sales office or Amphenol, Sidney, NY
