Large-Area Vane Anemometer

The compact testo 417 anemometer features a fixed flow-temperature vane to measure flow, volume flow and temperature.

Volume flow is shown directly on the clear backlit display. Just input the duct measurements, and accurate volume flow calculations are automatically displayed. You can also switch between flow and temperature.

Flow direction, either from pressure or vacuum source, is visible in the display. Timed and multi-point mean calculations provide information on mean volume flow, velocity, and temperature. Min/Max values can also be displayed. The "Hold" function freezes current readings in the display making data recording easy.

- Direction recognition of flow
- Temperature, flow and volume flow measurement
- Multi-point and timed mean calculation
- Max/min values
- Hold button to freeze readings
- Display light
- Auto Off function
