Designed to guarantee application assurance, the PCX5E Category 5e patch cords are center balanced with SPEEDGAIN 5e patch panels and jacks to deliver positive PSACR to 190MHz with enhanced warranty protection.

Category 5e patch cords connect hub to patch panel or wall-outlet to workstation and feature high performance stranded cable and enhanced performance modular plugs for superior performance. Category 5e patch cords are offered in a variety of sizes and cable colors to meet individual length and color coding requirements and are 100% performance tested for NEXT, Return Loss, Attenuation, and pair-to-pair ELFEXT.

Best of all, PCX5E patch cords feature a slimline strain relief boot that is flush with the modular plug. These slimline boots enable the patch cords to be installed in high-density active equipment and also prevents snags when pulling cable.
