General Data

RAFIX 16 control component range

- For a mounting hole diameter of 16.2 mm to IEC 60947, resp. Ø 23.1 mm for RAFIX 16F
- 250V/6A max.
- Water-jet proof IP65
- Contact blocks: Gold and silver contacts with quick-connect terminals 2.8 x 0.8 mm; Option: PCB plug-in socket
- 3 collar shapes, low-profile design
- The lamps of the pushbuttons can be replaced from the front or rear.
- The contact blocks snap directly onto the actuators without a coupling element and can be easily removed by turning = cost reducing assembly.

The specified data apply only if actuators/signal indicators are combined with contact blocks and lamp sockets within the same product range.

General information

RAFIX 16 is a complete control component series and enables you to design attractive control panels with a minimum of space requirements and at the same time sufficiently large actuating areas.

RAFIX 16 F, round

Actuators

Mounting hole according to IEC 60947

- Locating lug (easily removable).
The locating lug can be easily removed using a screwdriver.
- Degree of protection IP65 on frontside of the panel.
This is achieved by a reliable, tried and tested special seal.

RAFIX 16 actuators

- Grid spacing 25 x 25 mm (RAFIX 16 F 30 x 30 mm)
- 7 mm height from front panel (RAFIX 16 F 1.9 mm)
- Three collar shapes, in black
 - Square
 - Round
 - Square, alignable in flush fitting rows, which avoids accumulation of dirt between the collars.

Contact blocks

- Standard: for actuators with one-way operation
 - latching function
 - momentary function
- Universal: for E-stop pushbuttons and for actuators with two-way operation, e. g. selector switches
 - momentary function
- AS-Interface

Contact material

- Silver contacts for mains voltage
- Gold contacts for electronic circuits

Illumination

- Wedge base lamp or LED, socket W 2 x 4.6 d

Assembly

- Single-handed cost-effective assembly method
- Panel thickness 0.5 ... 5 mm (RAFIX 16 F 0.5 ... 3.5 mm)
- Fixing with hexagon nut
- Starting torque 1.2 Nm max.

Shock-resistance according to IEC 600 68-2-27

- Shock amplitude: ≤ 50 g
- Shock time: 11 ms
- Shock type: half sinusoidal

Environment conditions

- acc. to IEC 600 68-2, -14, -30, -33 and -78

Temperature range

- Operating temperature:
 - non-illuminated: - 25 ... + 70 °C
 - illuminated: - 25 ... + 55 °C
- Storage temperature: - 40 ... + 85 °C

Dimensional Drawings RAFIX 16

Contact block with quick-connect terminals and RAFIX 16 pushbutton

... with protection cage

... with multipole connector

... with PCB plug-in socket

Contact block with screw terminals and RAFIX 16 pushbutton

Contact block with quick-connect terminals and RAFIX 16 F keylock switch

Assembly/Disassembly

Assembly

- Insert the actuator through the panel cut-out from the front.
- If there is no locating indent provided in the cut-out, first remove the locating lug using a screwdriver.
- Screw the hexagon nut onto the actuator or signal indicator from the rear and tighten it using a fixing spanner.
- Click the contact block onto the actuator from the rear.
- Install protection against accidental contact, if applicable.

With quick-connect terminals

Contact cables with quick connector

With screw terminals

Push in cables and fix by screwing

Disassembly

- Turn the contact block by approx. 20° to the left or right – the latches open.
 - Pull the contact block off towards the rear.
- To dismount a PCB, pull the PCB with the soldered plug-in sockets off the mounted contact blocks.

Legending

• Label holders

All elements can be labelled using a separate label holder. The label holder is mounted together with the actuator/signal indicator. For order numbers and standard legend, refer to the section "Legending".

• Lenses

Non-illuminated push-buttons and mushroom-headed pushbuttons can be printed or laser engraved.

• Legend inserts

All illuminated pushbuttons and the majority of the signal indicators can be labelled by means of legend inserts. The legend inserts are fitted between actuator body and lens and can be easily changed.

RAFI can also provide you custom legending. Price and delivery on request.

Lamp replacement from front

Use the disassembly tool to grasp the actuator body and pull it towards the front with the lens.

Alternatively, you can use a screwdriver in place of the disassembly tool. In this case, insert the screwdriver between actuator body and collar and carefully raise the actuator body.

Replace the lamp using a lamp extractor or a suitable insulation sleeve.

Lamp replacement from front

RAFIX 16

Technical Data

General information		Mechanical characteristics	
Actuator	see order block	Operating travel	3 mm
Colour of lens	see order block	Robustness min.	100 N
Form of collar	see order block		
Dimensions		Other specifications	
Collar dimensions	see order block	Operating life (operations)	2,000,000
Overall height	see order block	Degree of protection from front side	IP65
Mounting depth	44.7 mm	Operation temperature min.	-25 °C
Mounting hole	16.2 mm	Ambient temp. operating max. without lamp /LED	+70 °C
Key grid	25 x 25 mm	Ambient temp. operating max. with lamp /LED	+55 °C
Mechanical design		Storage temperature min.	-40 °C
Mounting	ring nut	Storage temperature max.	+85 °C
Contact function	according to contact block	Environmental resistance	acc. to IEC 60068-2
Contact arrangement	according to contact block		-14, -30, -33 and -78
Illumination	see order block

Technical data see page 2 - 8

Accessoires:

Legend insert, blank, use only for transparent lenses: **5.70.637.000/2000**

Pushbutton for use in hostile environments. A transparent protective cap ensures a degree of protection of IP 66 to DIN/IEC.

Operating life: 500,000 operations.

For the „latching“ function, please use the standard contact block with „latching“ function.

General Data

The illuminated selector switches are provided with translucent handle markings. These are opaque on the non-illuminated versions.

RAFIX
16

Technical Data

General information

Actuator	handle
Marking of handle	see order block
Form of collar	see order block

Dimensions

Collar dimensions	see order block
Overall height	17.1 mm
Mounting depth	44.7 mm
Mounting hole	16.2 mm
Key grid	25 x 25 mm

Mechanical design

Mounting	ring nut
Contact function	see order block
Contact arrangement	according to contact block
Illumination	see order block
Rotating angle	see order block

Mechanical characteristics

Torque max.	1.3 Nm
-------------	--------

Other specifications

Operating life (operations)	30,000
Degree of protection from front side	IP65
Operation temperature min.	-25 °C
Ambient temp. operating max. without lamp /LED	+70 °C
Ambient temp. operating max. with lamp /LED	+55 °C
Storage temperature min.	-40 °C
Storage temperature max.	+85 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78

Approvals

IEC 61058

Illumination	Colour of mushroom	Order no.
no	opaque red	1.30.074.121/0301

Technical data see page 2 - 32

Only use universal contact blocks.

The positively driven mechanical arrangement is dupe-proof to DIN EN ISO 13850.

RAFIX 16 - Toggle switch

2

Technical Data

General information

Form of collar see order block

Dimensions

Collar dimensions see order block
Overall height 18.4 mm
Mounting depth 44.7 mm
Mounting hole 16.2 mm
Key grid 25 x 25 mm

Mechanical design

Mounting ring nut
Contact function latching
Contact arrangement according to contact block
Illumination no

Mechanical characteristics

Robustness min. 100 N

Other specifications

Degree of protection from front side IP65
Operation temperature min. -25 °C
Ambient temp. operating max. without lamp /LED +70 °C
Ambient temp. operating max. with lamp /LED +55 °C
Storage temperature min. -40 °C
Storage temperature max. +85 °C
Environmental resistance acc. to IEC 60068-2 -14, -30, -33 and -78
Operating life (operations) 300,000

Approvals

IEC 61058

C22.2 No. 14-M91

Typical accessories RAFIX 16 - Toggle switch

Description	Photo	Order no.	Additional accessories see page
RAFIX 16 - Standard contact block, 1 NC + 1 NO, momentary, silver contacts, without lamp socket		1.20.122.021/0000	2 - 82
RAFIX 16 - Standard contact block, 1 NC + 1 NO, momentary, gold contacts, without lamp socket		1.20.122.031/0000	2 - 76
RAFIX 16 - Standard contact block, silver contacts, without lamp socket, screw terminals		1.20.122.121/0000	2 - 83
RAFIX 16 - Standard contact block, gold contacts, without lamp socket, screw terminals		1.20.122.131/0000	2 - 77

Typical accessories RAFIX 16 - Toggle switch

Description	Photo	Order no.	Additional accessories see page
RAFIX 16 - Contact block AS-I, standard		1.20.130.101/0000	2 - 87
Label holder, flush, for square collar		5.07.620.004/0000	2 - 96
Fixing spanner for hexagon nut		5.58.002.034/0000	2 - 95

For other contact blocks, refer to the chapter „RAFIX 16 contact blocks“; for additional accessories, refer to the chapter „RAFIX 16 special accessories“.

RAFIX 16 - Toggle switch, square collar

Contact function	Illumination	Order no.
latching	no	1.30.075.001/0104

Technical data see page 2 - 36

Only use contact blocks with „momentary“ contact function.

RAFIX 16 - Toggle switch, round collar

Contact function	Illumination	Order no.
latching	no	1.30.075.021/0104

Technical data see page 2 - 36

Only use contact blocks with „momentary“ contact function.

RAFIX 16 - Toggle switch, square collar, alignable without gaps

Contact function	Illumination	Order no.
latching	no	1.30.075.041/0104

Technical data see page 2 - 36

Only use contact blocks with „momentary“ contact function.

RAFIX 16 - Potentiometer drive

Pict.: with potentiometer (not included)

condition as supplied

Panel cut-out

2

General Data

To operate potentiometers with a shaft diameter of 6 mm.
Suitable for potentiometers to DIN 41 450 with a shaft length of 32 mm.
Potentiometer not included.

RAFIX
16

Technical Data

General information

Form of lens handle
Colour of handle black
Form of collar see order block

Dimensions

Collar dimensions see order block
Overall height 23.65 mm
Mounting depth 19.2 mm
Mounting hole 16.2 mm
Key grid 25 x 25 mm

Mechanical design

Mounting ring nut
Thread nut M10 x 0,75

Other specifications

Degree of protection from front side IP65
Operation temperature min. -25 °C
Ambient temp. operating max. +70 °C
Storage temperature min. -40 °C
Storage temperature max. +85 °C
Environmental resistance acc. to IEC 60068-2 -14, -30, -33 and -78

General information

RAFIX 16 is a complete control component series with low profile design.

Actuators

- Panel cut-out $\varnothing$ 22.3 mm to IEC 60 947-5-1
- Panel cut-out $\square$ 23.1 mm

RAFIX 16 F, round

RAFIX 16 F, square

- Locating lug (easily removable).
The locating lug can be easily removed using a screw-driver.
- Degree of protection IP65 on panel.
This is achieved by a reliable, tried and tested special seal.
- Grid spacing 25 x 25 mm
- Low profile, only 1.9 mm in front of the front panel
- Thickness of front panel 0.5 ... 3.5 mm
- Fixing with hexagon nut
- Fixing torque 1.2 Nm max.

Contact blocks

- Standard: for actuators with one-way operation
 - latching function
 - momentary function
- Universal: for E-stop pushbuttons and for actuators with two-way operation, e. g. selector switches
 - momentary function
- AS-Interface

Contact material

- Silver contacts for mains voltage
- Gold contacts for electronic circuits

Illumination

- Wedge base lamp or LED with socket W 2 x 4.6 d

Shock-resistance according to IEC 600 68-2-27

- Shock amplitude: ≤ 50 g
- Shock time: 11 ms
- Shock type: half sinusoidal

Environment conditions

- acc. to IEC 600 68-2, -14, -30, -33 and -78

Temperature range

- Operating temperature:
 - non-illuminated: - 25 ... + 70 °C
 - illuminated: - 25 ... + 55 °C
- Storage temperature: - 40 ... + 85 °C

RAFIX 16 F - Pushbutton

2

General Data

RAFIX 16 F pushbuttons provide with less than 2 mm height above the front-panel an extremely low-profile design. The versions with square collars can be placed side by side so that a completely closed keyboard survey is possible.

RAFIX 16 F - Selector switch

Handle marking opaque white

2

General Data

The illuminated selector switches are provided with translucent handle markings. These are opaque on the non-illuminated versions.

RAFIX
16

Technical Data

General information

Actuator	handle
Colour of handle marking	see order block
Form of collar	see order block
Colour of collar	see order block

Dimensions

Collar dimensions	see order block
Overall height	12.1 mm
Mounting depth with contact block	50 mm
Key grid	see order block
Mounting hole	see order block

Mechanical design

Mounting	ring nut
Contact function	see order block
Illumination	see order block
Rotating angle	see order block

Mechanical characteristics

Torque max.	1.3 Nm
-------------	--------

Electrical characteristics

Protection class	-
------------------	---

Other specifications

Operating life (operations)	30.000
Degree of protection from front side	IP65
Operation temperature min.	-25 °C
Ambient temp. operating max. without lamp /LED	+70 °C
Ambient temp. operating max. with lamp /LED	+55 °C
Storage temperature min.	-40 °C
Storage temperature max.	+85 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78

Approvals

IEC 61058

RAFIX
16

Technical Data

Dimensions

Size not mounted	see order block
Mounting depth (with actuator / indicator)	see order block

Mechanical design

Mounting	snap on actuator
Contact system	bridge-contact self cleaning
Contact materials	Au
Contact arrangement	see order block
Contact function	see order block
Lamp socket	see order block
Terminals	see order block
Terminal marking	according to DIN 50013, X1 = +, X2 = -
Operating travel	3 mm
Robustness	100 N

Mechanical characteristics

Robustness	acc. to IEC 60947-5-5
------------	-----------------------

Electrical characteristics

Rated voltage min.	0.02 V
Rated voltage AC/DC max.	35 V
Rated current min.	0.001 A
Rated current max.	0.25 A
Operating life switching element (momentary)	2,000,000
Contact resistance when new max.	50 mΩ

Other specifications

Protection class	II
Shock resistance acc. to IEC 60068-2-27	amplitude < 50g, 11ms, half sinusoidal
Operation temperature min.	-25 °C
Ambient temp. operating max. without lamp /LED	+70 °C
Ambient temp. operating max. with lamp /LED	+55 °C
Storage temperature min.	-40 °C
Storage temperature max.	+85 °C
Colour code	white bottom
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Mechanical operating life latching (operations)	2,000,000
Resistance to vibrations acc. to IEC 60068-2-6	10 g at 20 ... 500 Hz
Flame class acc. to UL 94	yes
	yes

RAFIX 16 - Contact blocks AS-Interface, standard

2

General Data

The AS-Interface standard contact block can be combined with all RAFIX 16 and 16 F actuators and indicators. It is a slave with 2 input / 1 output lines for the AS-I fieldbus system. It is designed for the extended address range and meets the AS-I profile S-B.A.B.E (2 inputs / 2 outputs).
More information and detailed manual on request.

RAFIX 16 - Contact blocks AS-Interface, E-stop, Safety at Work

2

General Data

The AS-Interface E-stop contact block is a slave for the AS-I fieldbus system. It is designed for the standard address range and meets the AS-I profile S-7.B.E (safety slave with max. 4 input / 4 output lines). Up to 30 of these contact blocks can be linked to one AS-I line, the 31st. member is a safety monitor. The four (safe) input lines are used for the safe transfer of the E-stops switching position signal. The (not safe) output line is used to control the lamp in the E-stop or for an external signal lamp (option).

The coupling contact is an additional safety feature. It supervises the coupling between E-stop actuator and contact block and informs to the AS-I bus, when this connection is interrupted.

RAFIX 16 - Contact block AS-I, E-stop, Safety at Work

  					
Contact arrangement	Illumination	2-pole digital output, 24V / 15 mA	Coupling contact	Separate address plug	Order no.
2 NC	1 x LED red	yes (max. length of cable 10 cm)	yes	yes	1.20.130.001/0000
2 NC	1 x LED red	no	no	no	1.20.130.002/0000
2 NC	1 x LED red	no	yes	yes	1.20.130.011/0000

Technical data see page 2 - 88

RAFIX 16 - Lamp socket

2

Technical Data

Dimensions

Size not mounted	see order block
Mounting depth	see order block

Mechanical design

Mounting	see order block
Lamp socket	wedge-base W 2 x 4.6d
Terminals	quick connector 2.8 x 0.8 mm
Terminal marking	X1 = anode, X2 = cathode
Robustness	100 N

Electrical characteristics

Rated voltage	60 V
Rated power	1.2 W

Other specifications

Shock resistance acc. to IEC 60068-2-27	amplitude < 50g, 11ms, half sinusoidal
Ambient temp. operating min.	-25 °C
Ambient temp. operating max. with lamp /LED	+55 °C
Storage temperature min.	-40 °C
Storage temperature max.	+85 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78 V 0
Flame class acc. to UL 94	yes
Hot wire ignition acc. to IEC 60695-2-1	
Resistance to vibrations acc. to IEC 60068-2-6	10 g at 20 ... 500 Hz

Approvals

IEC 61058

C22.2 No. 14-M91

Typical accessories RAFIX 16 - Lamp socket

Description	Photo	Order no.	Additional accessories see page
Filament lamp, W 2 x 4.6d base, 24 - 30 V		1.90.120.005/0000	5 - 4
Filament lamp, W 2 x 4.6d base, 48 V		1.90.120.010/0000	5 - 4
Filament lamp, W 2 x 4.6d base, 12 V		1.90.120.012/0000	5 - 4
LED W 2 x 4.6d superbright, red, 24 V		1.90.690.361/0000	5 - 14

Typical accessories RAFIX 16 - Lamp socket

PCB plug-in socket

short text	Feature 1	Feature 2	Order no.
PCB plug-in socket, 10 contacts (universal application)	22 mm	24 mm	5.05.510.644/0000
PCB plug-in socket, 6 contacts (2 NO, lamp socket)	22 mm	24 mm	5.05.510.645/0000
PCB plug-in socket, 6 contacts (1 NC, 1 NO, lamp socket)	22 mm	24 mm	5.05.510.646/0000
PCB plug-in socket, 6 contacts (2 NC, lamp socket)	22 mm	24 mm	5.05.510.647/0000
PCB plug-in socket, 4 contacts (2 NC)	22 mm	24 mm	5.05.510.648/0000
PCB plug-in socket, 2 contacts (lamp socket)	22 mm	24 mm	5.05.510.649/0000

For soldering onto PCBs. The PCB carrying the plug-in sockets is plugged onto the contact blocks/lamp sockets. Additional fixing of the PCB to the contact block is not required. Solder terminals for PCB 3.5 mm long, for 1.3 mm hole.

Multipole connector

short text	Feature 1	Feature 2	Order no.
Multipole connector	21.8 mm	23.2 mm	5.05.510.421/0000

Makes it possible to simultaneously connect all terminals of a contact block. Can be fitted with 2.8 mm female quick-connect terminals.

Female quick-connect terminal DIN 46340-B 2.8-1-MS

short text	Feature 1	Feature 2	Order no.
Female quick-connect terminal DIN 46340-B 2.8-1-MS	-	-	5.37540.024/8622

With latching detent for mating with a multipole connector.

Plug distributor

short text	Feature 1	Feature 2	Order no.
Plug distributor	-	-	5.37540.029/6000

For mounting on the quick-connect terminals of contact blocks. The double number of contacts facilitates loop-through.

Protection against contact

short text	Feature 1	Feature 2	Order no.
Protection against contact	-	-	5.55.103.105/0100

Assembly sequence: Snap the protection against contact onto the contact block, connect wires to quick-connect terminals of contact block, pull protection against contact over the terminals; this ensures finger-proof condition to VBG 4.

Disassembly tool

short text	Feature 1	Feature 2	Order no.
Disassembly tool for LUMOTAST 25, RAFIX 16	-	-	5.05.800.042/0000

For replacing pushbutton and signal indicator lenses.

Protective cover, suitable for lead seal, for pushbuttons, alignable without gaps

short text	Feature 1	Feature 2	Order no.
Protective cover, suitable for lead seal	-	-	5.05.800.055/0000

To prevent inadvertent operation. The legend is easily visible even when the cap is closed.

Fixing spanner for hexagon nut

short text	Feature 1	Feature 2	Order no.
Fixing spanner for hexagon nut	-	-	5.58.002.034/0000

RAFIX - Insulating housing, Ø 16.2 mm

Pict.: 3-module

short text	Feature 1	Feature 2	Order no.
RAFIX - Insulating housing, Ø 16.2 mm, IP65, 1-module, light grey/dark grey	55 mm	100 mm	1.20.810.001/0000
RAFIX - Insulating housing, Ø 16.2 mm, IP65, 1-module, yellow/yellow	55 mm	100 mm	1.20.810.002/0000

RAFIX - Insulating housing, Ø 16.2 mm, IP65, 3-module, light grey/dark grey	115 mm	100 mm	1.20.830.001/0000
RAFIX - Insulating housing, Ø 16.2 mm, IP65, 4-module, light grey/dark grey	145 mm	100 mm	1.20.840.001/0000
Label sheet for housings	-	-	5.40.451.283/0000

- Attractive plastic housing to accommodate up to 4 control components
- 2 cable entries prepared: 1-,2-,3-part: M20x1.5, 4-part: M25x1.5
- Degree of protection IP65 to DIN
- All grey housings with overlay, legending possible with legend inserts
- Wall mounting with 2 screws through housing bottom prepared
- Dimensions (feature 1) x 100 mm x 74 mm
- Accessories: 50 pre-perforated legend inserts on a DIN A4 sheet for printing with a PC printer

RAFIX 22 QR - Insulating housing IP65, Ø 22.3 mm

short text	Feature 1	Feature 2	Order no.
RAFIX - Insulating housing, Ø 22.3 mm, IP65, 1-module, light grey/dark grey	-	-	1.20.810.201/0000
RAFIX - Insulating housing, Ø 22.3 mm, IP65, 1-module, yellow/yellow	-	-	1.20.810.202/0000
RAFIX - Insulating housing, Ø 22.3 mm, IP65, 2-module, light grey/dark grey	-	-	1.20.820.201/0000
RAFIX - Insulating housing, Ø 22.3 mm, IP65, 3-module, light grey/dark grey	-	-	1.20.830.201/0000
RAFIX - Insulating housing, Ø 22.3 mm, IP65, 4-module, light grey/dark grey	-	-	1.20.840.201/0000

Accessoires:

Label sheet for housings: 5.40.451.283/0000

- Attractive plastic housing to accommodate up to 4 control components
- 2 cable entries prepared: 1-,2-,3-part: M20x1.5, 4-part: M25x1.5
- Degree of protection IP65 to DIN
- All grey housings with overlay, legending possible with legend inserts
- Wall mounting with 2 screws through housing bottom prepared
- Dimensions: (feature 2) x 100 mm x 74 mm
- Accessories: 50 pre-perforated legend inserts on a DIN A4 sheet for printing with a PC printer

RAFIX 16 - Label holder, flush, for square collar

RAFIX 16 F - Blanking cap

short text	Feature 1	Feature 2	Order no.
RAFIX 16 F - Blanking cap, black	opak black	23.1 x 23.1 mm	5.05.800.063/0000

General Data

RAFIX 22QR control component range

- For a mounting hole diameter of 22.3 mm to IEC 60947-5-1
 - 250V/10A max.
 - Water-jet proof IP65
 - 2 collar shapes
 - The lamps of the pushbuttons can also be replaced from the front
 - The contact blocks (silver or gold contacts) snap onto the actuators with a coupling
 - Screw, cage clamp, quick connect terminals or RJ12 connector
 - 3 NC + 3 NO max.
 - Contact blocks for AS-Interface connection
- The specified data apply only if actuators/signal indicators are combined with contact blocks and lamp sockets within the same product range.

Contact blocks marked with different colours for ease of identification in stock and when connecting.

- NC contacts: red cover
- NO contacts: green cover
- NC/NO contacts: one cover red, one cover green
- Lamp socket: black
- Silver contacts: basic housing colour is black
- Gold contacts: basic housing colour is grey
- The terminals associated with a contact pair are colour coded on the connection side and marked with the respective contact numbers:
1, 2 = NC
3, 4 = NO

The lamps of pushbuttons and signal lamps can be replaced from the front. This method saves time and increases safety since it eliminates the need for accessing the machine/control station interior and handling live cables for lamp replacement. After unscrewing the front ring, the lens can be removed and the lamp replaced.

2

RAFIX
22 QR

The components feature a removable locating lug. If installed without locating lug, the ring nut with claw can be used. Accurate alignment of the actuator can be achieved behind the front panel. The cast-on collar seal can not get lost nor be twisted during installation and allows single-person assembly: the actuator is held in the mounting hole by the cast-on seal and can then be fixed by screwing from the rear.

First, snap the lamp socket and contact blocks into the coupling. Then snap the assembly on to the actuator. To release it, the bayonet must be pressed (prevents inadvertent releasing at the same time).

Terminals

The RAFIX 22 QR contact blocks are available in different connection styles as required for your application:

- **Screw terminals**
The terminals are open and the captive screws are mounted in the terminal recess.
- **Quick connect/solder terminals 6.3 x 0.8 mm**
- **Spring-type terminals**
Simply insert a screwdriver to open the terminal, insert the cable and remove the screwdriver to close the terminal.
- **RJ 12-terminal**
Just plug in the cable with a RJ 12 connector.
- **AS-Interface**

Your advantage:

This offers your savings in three ways:

- Drastically reduced assembly time thanks to wire insertion from the rear, i. e. no more bending and lateral insertion of the wires required.
- You save material: No wire end sleeves are required.
- You save the time previously required for mounting the wire end sleeves.

Open the terminal

Insert the wire

Remove the screwdriver

Versatility of design for customized panels

The RAFIX 22 QR system does not only have a particularly low profile and is also available in many different versions. Your design options for your customized panels are nearly unlimited thanks to the interchangeable front rings and lenses. In this way you can achieve an attractive design while ensuring safe operation of your equipment at the same time. RAFIX 22 QR components are available either with a round or with a square collar.

The RAFIX 22 QR control component range meets all the technical requirements and current standards for control units. The system is of modular design. Actuators, contact blocks and lamp sockets can be combined freely.

Sequence of assembly/disassembly at screw, spring-type and quick connect terminal

- Fix the actuator in the front panel with the ring nut.
- Snap the individual elements (a maximum three contact blocks or two contact blocks together with a lamp socket) in the coupling. You can install them on any assembling axis.
- Insert the lamp or LED into the lamp socket.
- Snap the coupling with the contact blocks on to the actuator.
- Connect the cables.
- Disassembly is performed in reverse order. To remove the coupling from the actuator, the latch lever must be pressed (by hand or with a screwdriver).

Panel cut-out according to IEC 60947-5-1

All actuators are provided with a locating lug which may be removed using a screwdriver for installation into mounting holes if required.

With a grid spacing of 30 mm horizontally and 50 mm vertically, the collars of the square actuators touch each other. We recommend to use the same grid spacing also for the round collar shapes (IEC 60947-5-1).

Technical Data

General information

Form of lens	see order block
Colour of lens	see order block
Colour of front ring	see order block
Form of collar	see order block

Dimensions

Dimensions of collar	see order block
Overall height	see order block
Mounting depth with contact block without cable	56.4 mm
Mounting hole	Ø 22.3 mm
Mounting grid	50 x 30 mm

Mechanical design

Mounting	ring nut
Contact function	see order block
Illumination	see order block

Mechanical characteristics

Operating travel	4 mm
Operating force max.	approx. 5 N for 1 switching element
Robustness min.	100 N

Other specifications

Operating life (operations)	1,000,000 momentary/ 500,000 latching
Degree of protection from front side	IP65
Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78

Actuator	handle
Marking of handle	white
Colour of front ring	see order block
Form of collar	see order block

Dimensions

Dimensions of collar	see order block
Overall height	22.2 mm
Mounting depth with contact block without cable	56.4 mm
Mounting hole	Ø 22.3 mm
Mounting grid	50 x 30 mm

Mechanical design

Mounting	ring nut
Contact function	see order block
Illumination	see order block
Rotating angle	see order block

Mechanical characteristics

Operating force max.	approx. 5 N for 1 switching element
Torque max.	2 Nm

Electrical characteristics

Protection class	II
------------------	----

Other specifications

Operating life (operations)	500,000
Degree of protection from front side	IP65
Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78

Technical Data

General information

Actuator	Key
Colour of front ring	see order block
Form of collar	see order block

Dimensions

Dimensions of collar	see order block
Overall height	30.6 mm
Mounting depth with contact block without cable	56.4 mm
Mounting hole	Ø 22.3 mm
Mounting grid	50 x 30 mm

Mechanical design

Mounting	ring nut
Contact function	see order block
Illumination	no
Lock	RONIS
Wafers	4
Lock type	see order block
Main key	no
Symmetric key	no
Rotating angle	see order block
Key removal position	see order block

Mechanical characteristics

Operating force max.	approx. 5 N for 1 switching element
Torque max.	2 Nm

Electrical characteristics

Protection class	II
------------------	----

Other specifications

Operating life (operations)	300,000 momentary / 50,000 latching
Degree of protection from front side	IP65
Ambient temp. operating min.	-25 °C
Storage temperature min.	-40 °C
Ambient temp. operating max.	+70 °C
Storage temperature max.	+80 °C
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78

RAFIX 22 QR - Emergency stop pushbutton, dupe-proof to EN ISO 13850

Panel cut-out to IEC 60947-5-1

2

General Data

The emergency stop pushbuttons comply with IEC 60 204, IEC 60 073, IEC 60 947 and VDE 0113 Part 1. They are designed dupe-proof according to EN ISO 13850 with a positive mechanical movement sequence. A certain operating force must be exerted at the action point in order to prevent inadvertent operation. The pushbutton latches when pressed. The special shape of the actuator prevents the emergency stop pushbutton from being blocked. This means that the emergency stop process - once initiated - cannot be impeded by any jamming objects.

RAFIX 22 QR - Contact blocks AS-Interface, standard

2

General Data

The AS-Interface standard contact block is a slave with 2 input / 1 output lines for the AS-I fieldbus system. It is designed for the extended address range and meets the AS-I profile S-B.A.B.E (2 inputs / 2 outputs). Some versions offer an additional overload- and short-circuit-proof output for connection and control of an external LED or buzzer. Both outputs can reduce the rated current to 50%, 25% or 12.5%, so a dimming function can be realized. More information / detailed manual on request.

RAFIX 22 QR - Contact blocks AS-Interface, E-stop, Safety at Work

2
General Data

The AS-Interface E-stop contact block is a slave for the AS-I fieldbus system. It is designed for the standard address range and meets the AS-I profile S-7.B.E (safety slave with max. 4 input / 4 output lines). Up to 30 of these contact blocks can be linked to one AS-I line, the 31st. member is a safety monitor. The four (safe) input lines are used for the safe transfer of the E-stop switching position signal. The (not safe) output line is used to control the lamp in the E-stop or for an external signal lamp (option).

The coupling contact is an additional safety feature. It supervises the coupling between E-stop actuator and contact block and informs the AS-I bus, when this connection is interrupted.

RAFIX 22 QR - Lamp sockets BA 9s (MBC/MCC)

with contact block

2

RAFIX
22 QR

Technical Data

Dimensions

Dimensions with coupling	39.5 x 49.9 x 30 mm
Mounting depth without cable	56.4 mm

Mechanical design

Mounting	snap on coupling and actuator
Diode and resistor	see order block
Terminals	see order block
Terminal marking	X1 = anode, X2 = cathode

Lamp characteristics

Lamp socket	BA 9 s
Operating voltage AC/DC	see order block
Lamp power max.	2 W
Lamp voltage	see order block sinusoidal

Other specifications

Approvals	see order block
Robustness	acc. to IEC 60947-5-5
Shock resistance acc. to IEC 60068-2-27	50 g at 11 ms, amplitude half
Resistance to vibrations acc. to IEC 60068-2-6	10 g at 40 ... 500 Hz
Environmental resistance	acc. to IEC 60068-2 -14, -30, -33 and -78
Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Flame class acc. to UL 94	V 0
Hot wire ignition acc. to IEC 60695-2-1	yes

Approvals

RAFIX 22 QR - Contact module for field buses

2

General Data

Highly flexible bus gateway for structured connection of RAFIX control components. The RAFIX contact blocks with RJ 12 connectors can be plugged directly into the eight RJ 12 female connectors. In addition, you can connect further control components or other sensors or actuators via a male quick connector, e.g. limit switches or proximity switches, solenoid valves or luminous elements. The bus parameters can be set directly on the module to facilitate quick and easy start-up.

Technical Data

Dimensions

Length	204 mm
Width	106 mm
Height	28 mm

Mechanical design

Mounting	quick mounting on rails or back panels
Terminals	8 x RJ 12 e.g. for RAFIX 22 QR contact block
Digital inputs 24 V, electrically isolated	9
Digital outputs 24 V, 500 mA	see order block

Electrical characteristics

Bus interface	see order block
Rated voltage DC	24 V +/-20%
Rated power max.	10

Other specifications

Degree of protection	IP 20
Operation temperature min.	-10 °C
Operation temperature max.	+60 °C
Storage temperature min.	-25 °C
Storage temperature max.	+60 °C

RAFIX
 22 QR

General Data

RAFIX 22 FS control component range

- For a mounting hole diameter of 22.3 mm to IEC 60947
- Contact blocks with gold or silver contacts
- Depth behind panel only 9.2 resp. 27 mm
- Protection class min. IP65
- 2 collar shapes, round or square
- The PCB contact blocks can be combined with other components on the same PCB.
- Contact blocks with quick connectors and LED clips

The specified data apply only if actuators/signal indicators are combined with contact blocks and lamp sockets within the same product range.

Control components re-invented?

The RAFIX 22 FS series literally sets new standards in the domain of control components. The extremely low mounting depth provides entirely new opportunities in the design of machines and housings. This offers the possibility of combining functionality and design in an increasingly design-oriented industrial sector..

In addition to the low mounting depth, the design of the front elements offers numerous advantages to the user. All actuators are available with either square or round housing collar. Combined with the various front rings, this makes it possible to arrange the actuators in such a way that they are easily and individually recognised. For example, you can associate a defined colour with a specific command.

Moreover, the large number of colour options of the front ring makes it easy to customize it to the corporate colours of the various OEMs.

2

RAFIX
22 FS

Actuators

The actuators of the RAFIX 22 FS series have at least a degree of protection to IP65 and are therefore suitable for nearly every application. If you need to cope with even more severe environments, some actuators are also available with a degree of protection of IP69.

The mechanical operating life of most of the actuators is as high as one million operations and therefore fully sufficient for years of use with frequent input operations.

The RAFIX 22 FS series offers numerous actuators with a round or square collar shape:

- **Pushbuttons**
 - Optionally illuminated and opaque
 - With flush or raised lens
 - With flush or raised front ring
- **Selector switches**
 - Angle between positions 40°, 60° or 90°
 - Latching or momentary
 - Illuminated or non-illuminated
- **Keylock switches**
 - Angle between positions 40° or 90°
 - Latching or momentary
- **Signal indicators**
 - White, yellow, green, red or blue
- **Emergency stop pushbuttons to DIN EN ISO 13850**

Approvals

- IEC 60947-5-1/5
- UL

Front panel

Panel cut-out

The actuators of the RAFIX 22 FS series are suitable for 22.3 mm panel cut-outs according to IEC 60947-5-1. All actuators are provided with a locating pip.

This locating pip ensures the perfect fit of actuators with contact blocks for PCB-mounted components and is therefore critical for a design built with these contact blocks.

Grid spacing

The design principle makes it possible to use a minimum grid spacing of 30 mm x 30 mm. In such an arrangement, actuators with square collars can be aligned directly without any gaps.

When designing the grid spacing, it is recommended to consider any external legending required (for example, using label strips inserted into the front panel).

Assembly of the front actuators

Single-handed assembly method

For assembly, insert the actuator into the mounting hole from the front side. It is kept in the mounting hole by the cast-on seal. Subsequently you can screw on the actuator from the rear using the ring nut. You can perform these steps one after the other with one hand!

Even better: You can start by inserting all actuators from the front side first and subsequently fasten the threaded rings from the rear in one go. We recommend using the RAFIX fixing spanner to ensure proper tightening.

RAFIX 22 FS for any application

You can use different contact blocks as necessary for the application or mounting location. The actuators are suitable for both contact blocks with PCB solder terminals and contact blocks with quick-connect terminals.

The **contact blocks with quick-connect terminals** are mounted directly and permanently to the actuator.

Mounting depth: 27 mm

The **contact blocks with PCB solder terminals** are mounted on the printed circuit board and subsequently soldered. The mechanical connection with the actuators on the front side is established by thread studs. **Mounting depth: 9.2 mm**

Contact blocks with quick-connect terminals / direct mounting

2

System

RAFI offers contact blocks with quick-connect terminals for the tried and tested RAFIX 22 FS actuator series. The contact block snaps into the actuator with a gentle "click" and is thereby fitted permanently.

Concept

For those applications where designing a PCB layout is economically inefficient or not possible at all, the contact blocks with quick-connect terminals offer an economic alternative. Catch noses provided on the contact block snap precisely into the actuator. The screw neck of the actuator is provided with indents safeguarding a reliable union. The connection to the contact block is made with simple conventional quick-connect terminals. A fin arranged at the centre of the contact block helps to ensure good insulation and serves as a guide for the LED clip at the same time.

The new contact block with quick-connect terminals completes the RAFIX 22 FS series and makes it perfectly suitable for all customer requirements. Control components installed at detached locations can be integrated into the system **easily** and **without needing any tools**, thereby saving space, effort and material.

Assembly

The colour marks on the screw neck of the actuator and on the contact block prevent incorrect assembly and facilitate the assembly process. Gentle pressure on the contact block is sufficient to ensure reliable latching with the actuator. "Click to fit".

Please notice colour marking!

Advantages

- The speedy and straightforward mounting method for the contact blocks with quick-connect terminals saves valuable assembly time.
- The rigid connection between the contact block and the actuator is suitable for applications where shocks and vibrations occur.
- Cable harnesses can be pre-terminated with the contact blocks.

Specific fields of application are those ...

- where using a printed circuit board is economically inefficient, for example, at a distance from the main operating stations (e.g. emergency stop in a hazardous area).
- where standard control components need to be installed quickly. The time it takes to install RAFIX 22 FS contact blocks with quick-connect terminals is substantially shorter than with previous control component concepts.
- where severe vibrations and shocks occur. All the parts are firmly joined.
- where other components occupy much of the available space.

Essential features

- Mounting depth only 27 mm including LED clip and cable lugs
- Quick-connect/solder terminals 2.8 x 0.8 mm
- The contact block engages permanently with the actuator only at the time of final assembly
- Compatible with all RAFIX 22 FS actuators: Pushbuttons, selector switches, keylock switches, emergency stop buttons and signal indicators, with all advantages this series offers:
 - Large actuating and indicating areas
 - Round or square collar shapes
 - Panel cut-out to IEC 60947: 22.3 mm with locating indent
 - Degree of protection IP65 (water-jet proof)
- Protection against contact for quick-connect terminals and cable lugs: Short-circuit proof even when the connection wires are under tensile strain
- Gold contacts for 100% reliable switching of low voltages (5 V/1 mA min.) or:
- Silver contacts (250 V/4 A max.) for mains voltage
- Contact arrangements: 1 NC, 1 NO, 2 NC, 2 NO, 1 NC + 1 NO or, for safety-critical applications, 2 NC + 1 NO (E-stop "Plus 1")
- Illumination with replaceable superbright LED clips in various LED colours, with quick-connect terminals 2.8 x 0.8 mm
- Actuators / contact blocks, signal indicators / lamp sockets and LED clips can be stocked separately and are not assembled until final assembly. This ensures utmost flexibility and most economic stockkeeping for this product range.

All actuators with 3 positions

All actuators with 2 positions

Contact block with solder terminals for PCB mounting

System

The extremely low mounting depth enables you to use the control component as an integral building block of your system solution.

Concept

You can include the RAFIX 22 FS contact blocks into your PCB layout and arrange them next to other components. The contact blocks are located directly behind the actuators on the printed circuit board at a distance of only 9.2 mm behind the front panel, leaving a lot of space for other components. A 3 mm LED can be inserted into the central duct of the contact block, which makes it easy to implement an illumination. With the RAFIX 22 FS concept, you save space, effort and material.

Assembly

When developing a system, the operating unit needs to be designed once. This process involves designing the front panel and the printed circuit board behind it. Any assembly problems should be avoided as early as at this stage.

Front panel

The actuators (22.3 mm with locating pip, grid spacing 30 x 30 mm min.) are suitable for mounting in 1 to 3 mm thick front panels.

In addition to the panel cut-outs for the actuators, thread studs for fixing the printed circuit board must be designed on the rear. Legending by insertion of label strips can also be considered here, if necessary.

Printed circuit board

The contact blocks are fitted onto the printed circuit board and subsequently soldered, e.g. by wave soldering. On request, RAFI can also offer you complete systems with a completely assembled PCB.

PCB hole patterns (view on component side)

Contact scheme for selector and keylock switches

All actuators with 3 positions

All actuators with 2 positions

Assembly:

The printed circuit board is fastened to the front panel by means of thread studs. The one-time effort in the design phase ensures that assembly problems involving tedious troubleshooting procedures are avoided. This is economically very efficient for large production volumes.

The dimension of 9.2 mm behind the front panel is a mandatory requirement. Any spacers you may need for this purpose are available as RAFI accessories.

Formula for determining the spacer length:

9.2 mm less the front panel thickness equals the spacer height required.

Advantages

- The extremely low mounting depth is unique and makes it possible to develop applications with entirely new housing and machine designs.
- The series can be combined with RAFI short-travel keyswitches and provides an operating concept tailored to the customer application.
- Standardised production with printed circuit boards is profitable with large production volumes and saves assembly costs.

Specific fields of application are those ...

- where a printed circuit board is already envisaged in the design. Printed circuit boards are economically efficient for high production volumes because of the standardised production processes.
- where short-travel keyswitches are also used. RAFIX 22 FS PCB contact blocks can be combined, for example, with RAFI short-travel keyswitches of the MICON 5, RACON 8/12, RF 15/19 and KN 19 series.
- where only limited space is available; RAFIX 22 FS can be used to implement smaller housing formats. This results in savings of material and even tooling costs.

Essential features

- Mounting depth only 9.2 mm
- Solder terminals for PCB
- Compatible with all RAFIX 22 FS actuators:
- Pushbuttons, selector switches, keylock switches, emergency stop buttons and signal indicators, with all advantages this series offers:
 - Large actuating and indicating areas
 - Round or square collar shapes
 - Panel cut-out to IEC 60947: 22.3 mm with locating indent
 - Degree of protection IP65 (water-jet proof)
- Gold contacts for 100% reliable switching of low voltages (5 V/1 mA min.) or
- Silver contacts (250 V/4 A max.) for mains voltage
- Contact arrangements: 1 NC, 1 NO, 2 NC, 2 NO, 1 NC + 1 NO, 2 NC + 1 NO
- Illumination with LED's in various LED colours

E-Box

The RAFIX 22 FS E-Box is an elegant, extremely well-designed housing for control components. It can be used wherever individual control component units are required in remote places. Very typical, for example, for Emergency-Stop applications along a production line or on the safety fence.

The dimensions of the RAFIX 22 FS E-Box and also the assembly concept are based on the edge dimension of a 40 mm profile rail.

RAFIX 22 FS - Emergency stop pushbutton

Panel cut-out to IEC 60947-5-1

2

General Data

The emergency stop pushbuttons comply with IEC 60 204, IEC 60 073, IEC 60 947 and VDE 0113 Part 1. They are designed dupe-proof according to EN 418 with a positive mechanical movement sequence. A certain operating force must be exerted at the action point in order to prevent inadvertent operation. The pushbutton latches when pressed.

The special shape of the actuator prevents the emergency stop pushbutton from being blocked. This means that the emergency stop process - once initiated - cannot be impeded by any jamming objects. Please only combine „emergency stop“ contact block.

RAFI
SOLUTIONS WITH PASSION

NEW

RAFIX 22 FS - Emergency stop pushbutton „Plus 1“

Panel cut-out to IEC 60947-5-1

2

General Data

RAFIX 22 FS “Plus1”

Emergency stop pushbutton with 2 NC and 1 NO contacts

This special emergency stop pushbutton offers two redundant normally-closed contacts for the emergency off / emergency stop function and an additional signal contact. Unique design: 3 contacts accommodated in very compact dimensions (mounting depth 9.2 or 27 mm).

2 normally-closed (NC) contacts

Redundancy is more and more often a requirement for safety applications in mechanical engineering and control system development and helps to minimise the probability of failure of a system.

1 normally-open (NO) contact

The third contact – a normally-open contact – may be used, for example, for sending an information signal to a monitoring unit or master safety controller. The safety controller may then initiate a controlled shutdown, depending on the location and type of the hazard indicated.

The emergency stop pushbutton complies with the current standards. The positively guided mechanical movement of the pushbutton makes it dupe-proof according to DIN EN ISO 13850.

A RAFIX 22 FS “Plus1” emergency stop unit consists of a special emergency stop pushbutton and a suitable emergency stop contact block which can either be mounted directly (quick-connect terminals) or placed on a printed circuit board (THT version).

Approbations: IEC 60947-5-5 and UL 508 in preparation.

Only use with emergency stop “Plus1” contact blocks.

Technical Data

General information

form of lens	conical mushroom form
Colour of lens	red
form of collar	round

Dimensions

Mushroom Diameter	30
Overall height	see order block
Mounting depth	see order block
Mounting hole	see order block
Key grid	30 x 30
Diameter of collar	see order block

Mechanical design

Mounting	ring nut
Contact function	latching
Illuminability	no
Reset	see order block

Mechanical characteristics

Robustness min.	100 N
-----------------	-------

Other specifications

Ambient temp. operating min.	-25
Ambient temp. operating max.	+70
Robustness	acc. to IEC 600 68-2-3 and 2-30
Operating life (operations)	50,000
Degree of protection from front side	see order block
Storage temperature min.	-40
Storage temperature max.	+80
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Salt spray	IEC 600 68-2-11

NEW

RAFIX 22 FS - Contact block with quick-connect terminal and gold contacts

Pict.: Universal, Au contacts, 1 NC + 1 NO

E-stop, Au contacts, 2 NC

2

General Data

The contact blocks are inserted into the actuators and latch there permanently. Emergency stop pushbuttons require special contact blocks which you can recognise by the plungers being in the interior. In addition, the emergency stop contact blocks and actuators feature two assembly guides which prevent rotation during assembly. We recommend to choose the LED colour in the same colour as the lens of the actuator in order to ensure satisfactory illumination.

Technical Data

RAFIX 22 FS - Contact block for PCB with gold contacts

Pict.: Universal, Au contacts, 1 NC + 1 NO

E-stop, Au contacts, 2 NC

2

General Data

Illumination information:

The contact blocks are suitable for use with illuminated actuators: Insert the desired LED into the integrated LED base and subsequently solder it together with the contact block.

We recommend using superbright LED since this ensures homogeneous illumination.

Technical data see page 2 - 222

Caution: Emergency stop contact blocks can only be used with emergency stop pushbuttons.

The RAFIX 22 FS E-Box is an elegant, extremely well-designed housing for control components. It can be used wherever individual control component units are required in remote places. Very typical, for example, for Emergency-Stop applications along a production line or on the safety fence.

The dimensions of the RAFIX 22 FS E-BOX and also the assembly concept are based on the edge dimension of a 40 mm profile rail.

2

Simple assembly concept, based on 40 mm profile rails

- Insert metal clip in profile rail slot (locating noses on the clip ensure precise adjustment, fix with only one screw)
- The metal clip can also be screwed onto other surfaces.

- Mount housing bottom part
- Attach contact module
- Insert the wires
- Connect the terminals

- Insert RAFIX 22 FS actuator (e.g. Emergency-Stop) into housing top part
- Fix actuator with a ring nut

- Snap housing top part onto bottom part. Done!

RAFIX
22 FS

Drilling pattern for direct mounting with screws

- As an alternative to mounting with the metal clip, the bottom of the housing can be attached directly with M4 screws.

NEW

RAFIX 22 FS - E-Box Housing

2

General Data

- Extremely compact (dimensions 109 x 40 x 27 mm)
- Suitable for actuator from the RAFIX 22 FS control unit range (mounting hole $\varnothing 22.3$ mm)
- With yellow housing cap for Emergency-Stop actuator
- With grey housing cap for standard actuators, such as pushbuttons
 - Fixing with the timesaving one-hole screw attachment method, particularly suitable for aluminium profile rails
 - or alternatively by direct attachment with M4 screws
- Includes respective cable lead-in for direct cabling: side M16 or bottom: M20

Technical Data

General information		Other specifications	
Colour of housing cap	see order block	Protection as per EN 60529	IP 65

Typical accessories RAFIX 22 FS - E-Box Housing

Description	Photo	Order no.	Additional accessories see page
RAFIX 22 FS - Pushbutton, illuminated, flush lens, round collar, metal front ring, latching		1.30.250.031/1000	2 - 185
RAFIX 22 FS - Emergency stop pushbutton, not illuminable, reset by pulling, IP 69K		1.30.253.601/0300	2 - 204
E-Box contact modules for Emergency-stop applications		5.00.100.221/0000	2 - 229
E-Box contact modules for standard applications		5.00.100.234/0000	2 - 230

RAFIX 22 FS - E-Box, yellow, for Emergency-stop pushbuttons

NEW

Cable attachment	Colour of housing cap	Order no.
side M16	yellow	1.20.810.302/0000
bottom M20	yellow	1.20.810.304/0000

Technical data see page 2 - 226

2

RAFIX 22 FS - E-Box, grey, for pushbuttons

NEW

Cable attachment	Colour of housing cap	Order no.
side M16	grey	1.20.810.303/0000
bottom M20	grey	1.20.810.305/0000

Technical data see page 2 - 226

RAFIX
22 FS

NEW

RAFIX 22 FS - E-Box contact module with gold contacts

2

General Data

- With RAFIX 22 FS contact block for Emergency-Stop actuator or standard actuator
- Contact block with 2 contact cavities (for Emergency-Stop „PLUS1“ with 3 contacts)
- Option with LED for illuminated actuator components
- Line connection (max. 1.5mm²)
 - in bottom of housing
 - with spring clamp (rigid wire, wire with or without cable end sleeve)

Technical Data
