

# Kingston DataTraveler 400

kingston.com/flash

## PRODUCT DISCONTINUED – FOR INFORMATION ONLY

Stay in sync between multiple PCs.

Kingston's DataTraveler® 400 (DT400) USB Flash drive gives you the freedom to work on multiple PCs while keeping your data in sync and secure. In capacities up to 32GB, DT 400 is preloaded with MigoSync software and features a capless design for ease of use. Its MigoSync software lets you synchronize your files, email and Internet browser settings on your DT400. When you return to your main PC, MigoSync synchronizes your files from your drive to your PC to keep you current.

For added flexibility, Universal Mail Format<sup>1</sup> lets you access your email on applications other than the ones you use at home or at the office. If a guest PC doesn't support your main email application, MigoSync will let you access your email using other applications like Windows® Mail, Outlook, Outlook Express or Lotus Notes.

DT 400 is a great tool for today's road warriors; use it at your field office, home office, or client's computer — anywhere you have access to a PC with the applications you use. Create and maintain different workspace profiles, such as home, work, notebook, client, project, and then password protect them with SecureTraveler<sup>2</sup> software. SecureTraveler allows you to create and access a password protected secure area, called a "Privacy Zone" on your DT400.

### Create a more efficient organization

DT 400 is great for organizations with employees on the go. By allowing employees to use a single USB Flash drive between their office and home computers, DT 400 also allows organizations to make better use of generic applications-only notebook pools for use by field employees and other mobile professionals. The employee can use MigoSync to create a personalized, working environment. Those with administrative rights can protect corporate data by creating a partition on the drive for additional security with SecureTraveler.

Multifunctional and easy to use, DataTraveler 400 is backed by legendary Kingston® reliability plus a five-year warranty and 24/7 tech support.

### Specifications:

- **Capacities**<sup>3</sup> — 4GB, 8GB, 16GB, 32GB
- **Dimensions** — 2.58" x 0.71" x 0.41"  
(65.76mm x 17.98mm x 10.7mm)
- **Fast** — data transfer rates of 20MB/sec. read and 10MB/sec.write<sup>4</sup>

THIS DOCUMENT SUBJECT TO CHANGE WITHOUT NOTICE.

1 Universal Mail Format requires additional storage. Universal Mail Format only synchronizes email and contacts. When using Universal Mail Format, Outlook with Exchange and Lotus Notes with Domino access is limited to sending email. Without a valid SMTP configuration, email access is limited to viewing only.  
 2 Administrative privileges required.  
 3 Please note: Some of the listed capacity is used for formatting and other functions and thus is not available for data storage. For more information, please consult Kingston's Flash Memory Guide at [kingston.com/Flash\\_Memory\\_Guide](http://kingston.com/Flash_Memory_Guide).  
 4 Speed may vary due to host hardware, software and usage.  
 5 Conditions apply. See your local sales representative.  
 6 Although DT 400 is enhanced for ReadyBoost, SecureTraveler will not operate properly if ReadyBoost cache is enabled on the drive. However, you may enable ReadyBoost cache on a separate drive.  
 7 Remote system may require VPN connection.
