

# Don't Risk It! Earth It!

## X90 Static Earthing Clamp

Earthing electrostatically charged equipment with certified static earthing clamps is one of the safest and most cost effective methods of ensuring people are protected from static ignitions in potentially flammable or explosive atmospheres.

**ROBUST CONSTRUCTION** | ensures stable and continuous contact with electrostatically charged equipment

**TUNGSTEN CARBIDE TIPS** | penetrating & hard wearing enabling low resistance electrical connection for safe dissipation of static

**STAINLESS STEEL** | corrosion resistant construction extends useful operational life in tough industrial environments

**Best practise standards** (NFPA 77, CENELEC 50404) recommend the use of purpose designed static earthing clamps for **safely dissipating static electricity** in potentially flammable or explosive atmospheres

**ATEX**

The X90 is ATEX certified for use in Zone 0 / 20 gas and dust hazardous atmospheres

Heavy Duty  
Static Earthing  
Applications

**Cenelectrex**<sup>®</sup>

# X90 Static Earthing Clamp

Hard wearing  
**Tungsten Carbide Tips**  
penetrate hardened layers of  
coatings, dirt and rust which can  
**Inhibit Safe Static Dissipation**

**ATEX**

**Ex II 1 GD T6**

The robust construction of the **X90** is a perfect solution for earthing and bonding in **Heavy Duty Industrial Environments**.

Typical **Heavy Duty** applications cover earthing and bonding:

- Large Containers and Drums (50 litres and up)
- Tanks
- IBCs
- Mobile Tanker
- Railcar Wagons

The **X90** is supplied with 5m of **CenStat GREEN Retractable Spiral Cable**

**Cenelectrex**

The X90 forms part of the Cenelectrex® range of Static Earthing and Bonding Equipment available from Newson Gale Ltd.
