

Large Lights

#3850 BIG D™ RECHARGEABLE

With a 24 watt Xenon lamp, Pelican's new Big D Firelite is the brightest in its class and has the power that'll cut through the thickest smoke. Big D's head rotates to almost 180° , so you can set it down for low spotlighting or upright for aiming high. There are two operating modes: constant on and emergency strobe. Sturdy nylon shoulder strap included for ease in carrying. The base has the same mounting and wiring footprints as the LiteBox®. Both alkaline and rechargeable model will be available (back-up lamp included in the rechargeable version).

LiteBox is a registered trademark of Streamlight, Inc.
