STEINEL® Classic Quality

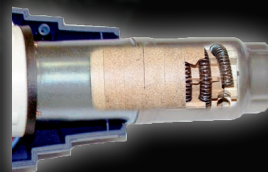

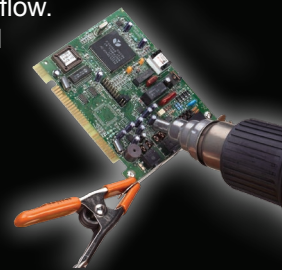

**HL 1910 E
Variable Temperature
Electronic Heat Gun**

Variable temperature: 120° F - 1100° F
3 Stage airflow: cool / 10.6 / 17.6 CFM
1500 Watts

**Electronic
Thermocouple Control**

Microprocessor measures and regulates heat produced, preventing heat back-up even with restricted airflow. Extends life of tool and enables use of specialty reduction nozzles.

**DuraTherm™
Heating Element**

Ceramic Encapsulated Heating System is unsurpassed for even heat and long life. Coils are wound through a series of stacked ceramic disks achieving a "honey-comb" effect that fully encapsulates and supports.

Made in E.U.
