

### Description

The STMP2141, STMP2151, STMP2161, STMP2171 power distribution switches are intended for applications where heavy capacitive loads and short-circuits are likely to be encountered. These devices incorporate 90 mW N-channel MOSFET high-side power switches for power distribution. These switches are controlled by a logic enable input.

When the output load exceeds the current limit threshold or a short is present, the device limits the output current to a safe level by switching into a constant current mode. When continuous heavy overloads and short-circuits increase the power dissipation in the switch, causing the junction temperature to rise, a thermal protection circuit shuts the switch off to prevent damage. Recovery from a thermal shutdown is automatic once the device has cooled sufficiently. Internal circuitry ensures the switch remains off until a valid input voltage is present.

### Features

- 90 mW high-side MOSFET switch
- 500/1000 mA continuous current
- Thermal and short-circuit protection with overcurrent logic output
- Operating range from 2.7 to 5.5 V
- CMOS and TTL compatible enable input
- Undervoltage lockout (UVLO)
- 12  $\mu$ A maximum standby supply current
- Ambient temperature range, -40 to 85  $^{\circ}$ C
- ESD protection: 8 kV HBM
- Reverse current protection
- Fault blanking
- UL recognized components (UL file number: E354278)

Table 1. Device summary

| Order codes |             |                      | Rated continuous output current<br>(mA) | Enable      |
|-------------|-------------|----------------------|-----------------------------------------|-------------|
| SO-8        | SOT23-5L    | MSOP8 <sup>(1)</sup> |                                         |             |
| STMP2141MTR | STMP2141STR | STMP2141TTR          | 500                                     | Active low  |

## 3 Functional description

### 3.1 Fault blanking

The STMP2 devices feature a 10 ms fault blanking. Fault blanking allows current limit faults, including momentary short-circuit faults that occur when hot-swapping a capacitive load, and also ensures that no fault is issued during power-up. When a load transient causes the device to enter current limit, an internal counter starts. If the load fault persists beyond the 10 ms fault blanking timeout, the FAULT output asserts "low". Load transient faults less than 10 ms (typ.) do not cause a FAULT output assertion. Only current limit faults are blanked. Die overtemperature faults and input voltage drops below the UVLO threshold cause an immediate fault output.

### 3.2 Overcurrent/overtemperature protection

In overcurrent or short-circuit condition, the switch limits the current at a value of about 120% of the rated current. If the temperature of the die goes above the limit value, the switch turns off.

### 3.3 Fault conditions

In power switch applications, 4 types of fault conditions are common. These fault conditions and the response of the STMP21x1 power switches are described in [Table 3](#).

**Table 3. Fault conditions**

| Fault         | Condition                                                                                  | STMP21x1 action                                                                                                    |
|---------------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Short-circuit | Output shorted to GND via resistance path of $< 1 \Omega$ , causing a rapid current surge. | Reduces output voltage to reduce the current. Asserts FAULT pin after a blanking period                            |
| Overcurrent   | Output connected to a load that sinks current above threshold.                             | Reduces output voltage to reduce the current. Asserts FAULT pin after a blanking period.                           |
| Overheating   | Temperature of junction exceeds 135 °C due to any reason.                                  | Turn OFF output until temperature falls below 125 °C. Asserts FAULT pin immediately.                               |
| Undervoltage  | Input voltage drops below the UVLO threshold.                                              | Turn OFF output until input voltage rises above the UVLO threshold plus hysteresis. Asserts FAULT pin immediately. |

### 3.4 Reversed current blocking

When the switch is OFF (disabled through the EN pin), or when the STMP2 device is unpowered ( $V_{IN} = 0\text{ V}$ ) the switch behaves as an Hi-Z at the output pin, ensuring that no reverse current will flow into the device when  $V_{IN} < V_{OUT}$ .

*Note:* In the case where the switch is ON, and a voltage higher than  $V_{IN}$  is applied to the OUT pin, a reverse current occurs. This operating condition is not allowed.

### 3.5 UVLO

When the input voltage drops below critical values, the power switch turns off to prevent improper operation due to low voltage.

## 4 Ambient temperature

In “Enable” operating mode, an amount of power is dissipated as heat in the power switch due to the on-resistance. The power dissipation is:  $P = I^2 R$ .

## 5 Maximum ratings

Stressing the device above the rating listed in [Table 7: Absolute maximum ratings](#) may cause permanent damage to the device. These are stress ratings only and operation of the device at these or any other conditions above those indicated in [Section 5.2: Recommended operating conditions](#) of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

### 5.1 Absolute maximum ratings

**Table 7. Absolute maximum ratings**

| Symbol     | Parameter                      | Value                     | Unit |
|------------|--------------------------------|---------------------------|------|
| $V_{IN}$   | Input voltage range            | -0.3 – 6.0                | V    |
| $V_{OUT}$  | Output voltage range           | -0.3 – ( $V_{IN} + 0.3$ ) | V    |
| $V_{IENX}$ | EN Input voltage range         | -0.3 – 6.0                | V    |
| $I_{OUT}$  | Continuous output current      | Internally limited        | -    |
| ESD        | ESD protection level (HBM)     | 8                         | kV   |
| $T_J$      | Junction operating temperature | -40 to 125                | °C   |
| $T_{STG}$  | Storage temperature            | -55 to 150                | °C   |
| $T_R$      | Thermal resistance (MSOP8)     | 220                       | °C/W |
| $T_R$      | Thermal resistance (SOT23-5L)  | 191                       | °C/W |
| $T_R$      | Thermal resistance (SO-8)      | 160                       | °C/W |

### 5.2 Recommended operating conditions

**Table 8. Recommended operating conditions**

| Symbol                                | Parameter                 | Value |      |      | Unit |
|---------------------------------------|---------------------------|-------|------|------|------|

## 7 Detail device characteristics

### 7.1 STMP2141, STMP2151 additional electrical charts

The waveforms displayed in [Section 7.1](#) are captured with the STMP2141 device. The STMP2151 device is expected to have the same characteristics with EN in the opposite polarity.

#### 7.1.1 Turn-on/off characteristics at $V_{OUT} = 5.0\text{ V}$

Figure 3. Voltage output turn-on delay time (STMP2141/2151, 5 V)

Figure 4. Voltage output turn-off delay time (STMP2141/2151, 5 V)

Figure 5. Current output turn-on delay time (STMP2141/2151, 5 V)

Figure 6. Current output turn-off delay time (STMP2141/2151, 5 V)

### 7.1.2 Turn-on/off characteristics at $V_{OUT} = 3.0\text{ V}$

Figure 7. Voltage output turn-on delay time  
(STMP2141/2151, 3 V)

Figure 8. Voltage output turn-off delay time

Figure 27. UVLO vs. temperature (STMPS2141/2151)

## 7.2 STMP2161, STMP2171 electrical charts

The waveforms displayed in [Section 7.2](#) are captured with the STMP2161 device. The STMP2171 device is expected to have the same characteristics with EN in the opposite polarity.

### 7.2.1 Turn-on/off characteristics at $V_{OUT} = 5.0\text{ V}$

Figure 28. Voltage output turn-on delay time (STMP2161/2171, 5 V)

Figure 29. Voltage output turn-off delay time (STMP2161/2171, 5 V)

Figure 30. Current output turn-on delay time (STMP2161/2171, 5 V)

Figure 31. Current output turn-off delay time (STMP2161/2171, 5 V)

## 7.2.2 Turn-on/off characteristics at $V_{OUT} = 3.0\text{ V}$

Figure 32. Voltage output turn-on delay time  
(STMP2161/2171, 3 V)

## 8 Package mechanical data

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.

| 01-Aug-2007 | 1        | Initial release.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 18-Dec-2007 | 2        | Minor text changes, updated Figure 53 on page 28, added Section 7: Detail device characteristics on page 16.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 24-Jan-2008 | 3        | Footnote added in Table 1 on page 1, replaced Figure 58 on page 32 and Table 20 on page 32, TSSOP8 package name replaced with MSOP8.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 17-Jul-2009 | 4        | Updated Chapter 3, test conditions modified for I <sub>reverse</sub> in Table 12 on page 14 and Chapter 7.<br>Added: Figure 55, Figure 56, Figure 59, Figure 59 and Figure 60.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 21-Nov-2012 | 5        | Updated Table 1 (replaced "Current limit" by "Rated continuous output current").<br>Updated values and units in Table 4 to Table 6.<br>Corrected Figure 1 and Figure 2 (replaced EN_N by EN).<br>Replaced I <sub>I</sub> by I <sub>IN</sub> , I <sub>LIMIT</sub> by I <sub>OS</sub> , I <sub>O</sub> by I <sub>OUT</sub> , mS by ms, OC by FAULT, R <sub>ds(on)</sub> by R <sub>ON</sub> , V <sub>I</sub> and V <sub>CC</sub> by V <sub>IN</sub> , V <sub>O</sub> by V <sub>OUT</sub> , in the whole document.<br>Updated Section 5 (added cross-references).<br>Updated Table 9 and Table 10 (replaced Tr by t <sub>r</sub> ), Table 11 (updated test conditions).<br>Updated Table 15 (replaced Fault, OCx, and V <sub>OC</sub> by FAULT).<br>Updated Table 16 (replaced V <sub>IENX</sub> by V <sub>IEN</sub> , mF by μF).<br>Updated titles of Figure 3 to Figure 52 (added conditions).<br>Updated Figure 3 to Figure 16, Figure 25, Figure 26, Figure 28 to Figure 41, Figure 50 and Figure 51 (replaced R <sub>L</sub> by I <sub>L</sub> , mS by ms, and uF by μF).<br>Updated Figure 55, Figure 59, and Figure 59 (removed superfluous references to notes).<br>Reformatted Section 8 (moved Figure 57 on page 31).<br>Removed Figure 56.<br>Updated Table 21 (added SOT23-5L, SO-8, and MSOP package and max. value for SOT23-5L package).<br>Added Section 9.<br>Minor corrections throughout document. |
| 25-Jan-2013 | 6        | Updated Features (added UL recognized components).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 14-Feb-2022 | 7        | Updated Features on the cover page, <a href="#">Figure 21</a> , <a href="#">Figure 22</a> , <a href="#">Figure 46</a> and <a href="#">Figure 47</a> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
