

Key features

- up to 8 watts
- low cost
- choice of height profiles
- flame retardant
- proven reliability
- resistant to pcb solvents
- mechanised assembly

Specification

Power Resistors

type FC series

This small size pluggable, high power resistor is a popular product in the Meggitt Electronic Components range. The resistors are wire wound on to an inert core of glass fibre. The leads and end cap assemblies are firmly crimped onto the core and winding. A particularly resilient silicone cement coating provides a humidity and flameproof seal.

Resistance Tolerance: $\pm 5\% \pm 10\%$ ($<1R0=\pm 10$)
Shelf Life: $\Delta R\%$ 2% maximum after 3 years
Load Life: $\Delta R\%$ 3% maximum after 1000 hours, nominal power
Overload: $\Delta R\%$ 2% maximum after 10x rated power 5 seconds
Climatic Category: 55/200/56 ΔR maximum 3%
Maximum Operating Voltage: $\sqrt{P \times R}$
Flammability: BS415 Clause 20:1
Marking: Resistor Value - Resistor Tolerance
Derating: FC Series derate from 100% of power at 70°C to zero at 350°C linearly

Power Resistors

type FC series

They are available in a choice of height profiles and the FCX type can be supplied with axial leads. The FC series is widely used in monitors, power supplies, white goods and brown goods where a low cost, high power resistor is required.
