Technical Data

Center to Center Spacing: 5 mm (0.197 in.)

Application

You can now convert one more component on your board to a genuine surface mount. You can increase packaging accuracy and component density, use both sides of the PCB, reduce and eliminate set-up costs and simplify and streamline your processes. The patented 971-SLR-SMD "nail head" pin design ensures a secure and reliable contact with the printed circuit board. The 0.15 mm coplanarity tolerance of this pin strip allows reliable soldering to PCB approaching zero defects for this characteristic and its effects. Plastic thermo resistant caps ensure automated pick & place-ability for both odd and even pole versions. (Consult our "Tape & Reel Data" table within our Technical Information section for details.

Dimensions: mm (in.)

Length of Connector (L)

L = No. of Poles x Center to Center Spacing - 0.6 mm

(B) Removable vacuum pick surface

(C) Recommended pad footprint

(D) Stencil thickness

When locating connector, allow 0.5 mm clearance around it for process-induced variations.
